

PUBLIC NOTICE
JOINT BASE MCGUIRE-DIX-LAKEHURST

Joint Base McGuire-Dix-Lakehurst (JB MDL), in coordination with the U.S. Environmental Protection Agency (EPA) Region 2 and New Jersey Department of Environmental Protection (NJDEP), has completed a five-year review of existing decision documents and ongoing environmental cleanup activities at the following five JB MDL-Dix Area sites: Sanitary Landfill (LF010), EPIC-8 Landfill (LF017), 4300/4400 Area (SS005B), Magazine-1 Area (SS007), and New Egypt Armory (TU026). The Dix Area of JB MDL was formerly known as Fort Dix. The five-year review was conducted pursuant to Comprehensive Environmental Response, Compensation and Liability Act §121 (c).

The purpose of the five-year review was to assess whether remedial actions performed at the Dix Area sites continue to be protective of human health and the environment. The five-year review concluded that the current remedies are protective. As part of the review, JB MDL and EPA solicited questions or information regarding the remedial actions from the public.

The Final Five-Year Review Report is available to the public as of May 2023. This report documents the methods, findings and conclusions of the review and also identifies issues found during the review and makes recommendations for addressing these issues.

The Five-Year Review Report and other relevant environmental documents are available for review at the Burlington County Library, 5 Pioneer Boulevard, Westampton, New Jersey and electronically at <https://ar.afcec-cloud.af.mil/>.
